# Engraving

Select urns & memorial items can be engraved. These items have the € indicator on their photo on each catalog page. Urns and memorials can be engraved using one of Terrybear's choice fonts (see below).

Terrybear utilizes both Rotary and Laser methods of engraving. All four fonts are available with either method. Terrybear's Engraving Specialists will determine the best method of engraving for all engravable product options.

An oxidizing agent (used to darken the engraved text) may be used on some metal urns and pendants. Terrybear's Engraving Specialists will determine whether this option is appropriate for your item based on the handcrafted nature of the memorial.

Your font selections include:

## Arial

ABCDEFGHIJKLM  
NOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxy  
z
